2026-2027

President's Message

As this year's Co-Presidents, we are excited to start another year at the Lake and Hills Garden Club. The past 37 years have been a combination of hard work, service, learning and fun for members. So many new friendships have developed and endured through the years. Members have focused on projects that allow them to share their passions, while helping community and promoting Lake and Hills Garden Club's goals and standards.

Our theme for this year is Birds, Bees, and Blooms. Our inspiration for this theme came from a visit we made to the Keehn Family Farm last year. We learned how to make an ecologically friendly garden. Fertilizing and pest control came from the chickens and geese that lived in the gardens. Later in the year we learned how to attract birds by adding various bird friendly plants to our gardens. Learning the value of bees in our gardens came later in the year. The garden club has many efforts at growing to protect the environments in our community including Birds and Blooms, Butterfly Gardens, Garden therapy, Tea Potters, and Pot Heads and Dead Heads. We also support youth learning programs such as Seneca and Wahalla FFA chapters and Camp Wildwood. Our efforts will be sustained in the coming year.

In conclusion, we would like to thank all our committee chairs and all members of the Lake and Hills Garden Club for your kind guidance in advance as we start our first year as Presidents.

Margaret and Evelyn
